COVID-19 and our Safety & Health Week Presentations 19, 20 and 21 January 2021

It really was great to see such good attendances at our Breakfast Talks last week.

Unknown to all of us at the time, was that COVID-19 would re-appear across our community just a few days later and, inevitably, with over 200 people attending our three breakfasts, it has become apparent in the last day or so that several people who attended are now showing signs of the COVID-19 virus and some of their relatives and friends are similarly showing signs of the virus.

We want you to be aware that there was infection present at our Breakfast Talks and have reported the matter to Guernsey’s Public Health Team. If we receive specific guidance from them, we will, of course, notify you.

In the meantime, here is the guidance they have issued generally:

We are, as an island, in a position of Lockdown. If you attended the breakfast meetings last week, please self-isolate and follow the guidance given by Public Health above. Thank you and we hope you will keep well.
